Office Action Summary

Restriction is required under 35 USC121 and 372.

This application contains the following inventions, which are not linked as to form a single inventive concept under PCT Rule 13:1

Group I: claims 1, 3, 5, 10-12, 25, 26, 143, 146, 147, 148 and 153-160, drawn to a method of adjusting the atmosphere within a chamber.

Group II: claims 117, 120, 122-125, 129, 132 and 82, drawn to an apparatus for adjusting the atmosphere within a chamber.

Group III: claims 41, 44, 45, 49 and 62, drawn to a method of making a chamber capable of converting the atmosphere within the chamber.

The special technical feature linking the inventions is the concept of reducing the level of CO₂ when it gets too high (by using an absorbent), which concept does not provide a contribution over the prior art as evidenced, for example, by the cited Transfresh Reference (WO 91/15719), or Dow Chemical (WO95/05753), or Shipping Corp. of N. Zealand (EP 0136042).

In accordance with 37CFR. 1.499, applicant is required in response to this Office action, to elect a single invention to which the claims must be restricted.
